

Sam O'Brien

INFO

Full-stack engineer with product ownership and team lead responsibilities focused on leading by example, active co-ordination and continuous integration, forward thinking design and innovation, best practices and continuous improvement following the Kaizen principle

SKILLS

Backend web development

Spring Spring boot Spring bean Spring bean Dropwizard Play Jackson Netty JUnit Akka Sockets
Hamel SQL No SQL Database normalisation Schema design Natural cardinality Cassandra
io mySql Gato IOC ACP JPA JMS

Front web development

Vue.js PEG.js jsj bowser yarn npm node.js html css bootstrap

Ops

Jenkins test midnight commander salt apache benchmark naven database migration
Liquibase Flyway Heroku AWS Linux Chef SGE

EMPLOYMENT

Senior software engineer, V\$ware / Visma

2015-07 - Present [Agile PM java maven sbt event oauth spring play dropwizard spring boot scala kotlin ruby chef ops and mySQL cassandra activator akka domain driven design leadership stakeholder management

Senior full-stack engineer with product ownership, team lead and development responsibilities. This role includes overseas travel to meet with 3rd party services for API negotiations, writing and managing stories from requirements to completion, managing development resources and several solo-developed revenue generating micro-services. I also pushed for and introduced effective data validation patterns: On the JS side, REST API validation and tightly constrained DB cardinality leading to very high quality data and natural prevention of bad states.

- Solo-developer of a revenue generating micro-service based integration with Microsoft Active Directory and Office 365 with yearly subscription fee of 1-2k per customer depending on features
- Lead developer and Product owner of a major piece of employee planning and cost management software developed with a team of 5, managing dynamic requirements changes. Featuring strict validation, natural cardinality, persistent programming patterns, caching and completely validated DTOs in Spring, JSP, Rivets and MySQL
- Product owner of all 3rd party integrations including OAuth and Saml 2.0 authenticated single sign on, and data importation and marshalling
- Pushed new validation and development patterns focused on the Kaizen principle of continuous improvement which were widely adopted by the team

Software Engineer, Logentries

2014-02 - 2015-07 [Agile java maven sbt oauth dropwizard netty spring boot scala kotlin ruby chef ops and mySQL cassandra activator akka domain driven design leadership stakeholder management

Developer focused on backend services including developing the in-house query language, metrics retrieval, validated REST API exposure etc. in an Agile environment

- Developed a parser and query language to access the log data API
- Produced a high quality validated and acceptance tested externally exposed API

Draughtsman and Administration, Flanagan Architects

2012-02 - 2012-08

Contract for project in London, draughtsman, coordination and administration responsibilities.

Design team lead, Farm from a Box

2011-02 - 2012-01 [Design leadership administration

Coordinating a team of 7 volunteers to produce an initial set of designs for a modular farming solution for disaster relief.

Draughtsman and Administration, 3D Architects

2010-07 - 2011-01

Work included producing planning permission and other legal applications, design and technical documentation to strict legal and design requirements.

Draughtsman and Administration, Flanagan Architects

2007-05 - 2008-06

Work included producing planning permission and other legal applications, design and technical documentation to strict legal and design requirements.

PROJECTS

Contributor, RE2 for java

java C++ JRE RE2 REGEX

Implemented named capture groups as an extension of indexed capture groups in the library to facilitate same in Logentries query language.

Creator, trade-processor

java Dropwizard web sockets Flyway Heroku MySQL

Heroku deployable Dropwizard application using db migration, web-sockets, rate-limiting and meta-data analysis.

Creator, Full-stack SAAS messaging and NLP project

java Spring Vue.js Liquibase Cassandra Play

Full stack SAAS project using Spring Boot, Play, Cassandra, MySQL, Liquibase, jsj and Vue.js

EDUCATION

M.Sc Computer Science, University College Dublin

2012-08 - 2014-01 [java C++ Ruby Database design Software Engineering Natural language processing Search aggregation and 5d Dimensional clustering

1st class Honors degree in Computer Science. Recipient of commendation from the Dean of the course.

B.Sc Architectural Science, University College Dublin

2006-05 - 2010-07
